

The Gothic Collection

The *Gothic* cast iron radiator offers maximum heat output and combines efficiency with a beautiful period effect.

The *Gothic* column cast iron radiator is a design exclusive to Beaumont. Based on an original Pugin style, the Gothic rose and arch design brings a dramatic touch to any room.

The *Gothic* is 663mm in height and arrives completely assembled ready to fit to your new or existing pipework.

We have a wide range of valves and accessories available to complete the authentic period design of this unique and stylish radiator.

All Beaumont cast iron radiators are carefully hand built to your own required BTUs and fully assembled ready for plumbing into your new or existing pipework.

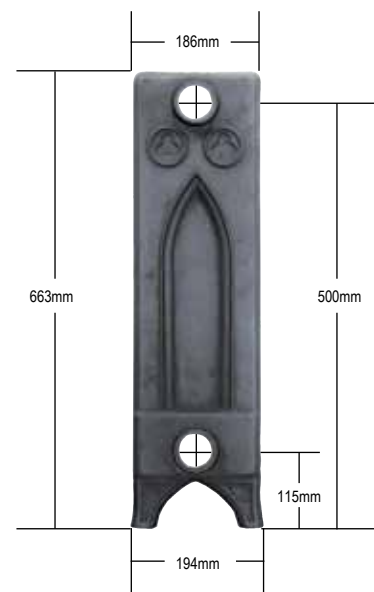

The *Gothic* can be finished in a variety of colours – metallic, Farrow & Ball range, the RAL chart or primed for onsite painting.

Each radiator section is hand cast so total length may vary slightly. The columns below give some idea of the approximate length but we strongly advise against finalising any pipework until radiators are on site.

The maximum number of sections for this radiator is 15.
